HOW INDIA SCRIPTED COVID VACCINATION SUCCESS STORY

INTERVIEW

India recently achieved the historic feat of administering 200 crore doses of COVID vaccines. Tering this feat as a proud moment for the country, Union Minister of Health and Family Welfare, Dr. Mansukh Mandaviya has thanked the people involved in this campaign, whose tireless efforts made it possible. Speaking with Bhupendra Singh of All India Radio for Employment News, the minister said the vast network of health workers deployed for timely vaccination of the citizens and the special thrust on research and development of indigenous vaccines were the key drivers for India's successful and fast-paced COVID vaccination campaign.

Question: India started its COVID vaccination drive on 16th January 2021. In just 18 months, more than 200 crore doses have been successfully administered to eligible citizens. What have we learnt from the experience so far?

Dr Mansukh Mandaviya: The vaccination drive traces India's steadfastness in carrying out speedy research and seamlessly executing a campaign of such a large scale. This campaign has also proved that there is no shortage of abilities and capabilities in the country's human resources. The country has had immense potential for centuries. It is just a matter of how to preserve it and bring it out. From my point of view, it was Prime Minister Shri Narendra Modi who led the way by entering mission mode right from the moment when the first case of

COVID was detected in the world and in India. He took no time in bringing together the scientists and officials for devising a strategy for the impending threats. The biggest

challenge at that time was that no one knew about this virus and how it would behave. Another crucial question was that if the virus spread at an uncontrollable pace, how would we deal with the situation? Keeping this in mind, the Prime Minister constituted several committees. A committee of experts and scientists was formed. Research on COVID started. The Prime Minister was of the opinion that an effective vaccine was the only weapon to combat the deadly disease. But looking at history, any vaccine that was researched upon and developed anywhere in the world took almost 5-10 years to reach India. Hence, we were faced with the very troublesome question, which was, "what if the vaccine being developed elsewhere reaches India late...what will be the condition of Indians grappling with the disease?" Keeping all this in mind, the government spent a lot of money on research by trusted scientists, pharmaceutical companies and manufacturers of medical devices. As a result, indigenous vaccines were developed in the country in no time.

Question: The pace at which India administered COVID vaccines has been much faster than many developed countries. What were the factors that contributed in the speedy delivery of vaccines to the world's second largest population?

Dr Mansukh Mandaviya : It was not an easy task. We worked on three fronts simultaneously - public

CAREER IN VETERINARY SCIENCE

Nidhhi Prasaad

Livestock plays an important role in Indian economy. The livestock sector is performing well in the manner of production, value addition and export of dairy, fishery, wool, meat, poultry and other products. Apart from nutritional security, livestock sector extends its arms in terms of year round employment and income to the landless, marginal and small farmers. The achievement of livestock sector not only depends on the farmers but also on services of veterinary manpower. Veterinarians have multifaceted roles, ranging from assisted breeding in the form of artificial insemination, health care and imparting extension services. The growth of livestock population and veterinary manpower should be at par as any imbalance in the same would have crucial effect in the livestock production and thus leads to drastic consequences like nutritional insecurity, unemployment and poverty. Hence, the career scope of veterinary science is large and ever growing.

Role of Veterinary Science in National Economy

- India is considered an agricultural country. 60% of its population still depends on agriculture & allied sectors for their livelihood.
- Livestock play an important role in the socio-economic development of the country.
- The agriculture sector has experienced buoyant growth in the past two years. The

sector, which is the largest employer of the workforce, accounted for a sizeable 18 percent (2021-22) in Gross Value Added (GVA) of the country registering a growth of 3.6 percent in 2020-21 and

3.9 percent in 2021-22. Growth in allied sectors including livestock, dairying, and fisheries has been the major driver of overall growth of the agriculture sector.

- Milk ranks first in terms of monetary value output among all agriculture commodities.
- Livestock are the best insurance against the vagaries of nature like drought, famine, and other natural calamities.
- Livestock supplement the family income and generate gainful self-employment, particularly for landless laborers, small and marginal farmers, and women.
- The livestock sector not only provides essential proteins and a nutritious human diet through milk, eggs, meat, etc.

INDIA'S DIGITAL HEALTH ECOSYSTEM JOURNEY SO FAR AND WAY FORWARD

**Rajib Kumar Sen
Shrestha Hazra
Vaishnavi Iyer**

The term 'digital health' primarily refers to the applications emerging out of the interaction between healthcare and technology. The World Health Organization defines digital health as "a broad umbrella term encompassing eHealth, as well as emerging areas, such as the use of advanced computing sciences in 'big data', genomics and artificial intelligence". The phenomenon of digital health is commonly described as a "cultural transformation of how disruptive technologies that provide digital and objective data accessible to both caregivers and patients leads to an equal level doctor-patient relationship with shared decision-making and the democratization of care." The notion of digital health or eHealth brings to the forefront the power of Information Communication Technologies (ICTs) in the healthcare sector, making it better-equipped with cutting-edge resources to ensure efficient management and optimal diagnosis, over and above everything, better patient care. The innovative outcomes of digital health include a host of areas, right from doctor-patient communication, to research and hospital management. The digital health initiative has played a pivotal role in ameliorating health care services, thereby bringing communities closer to seeking health care needs through all feasible modalities.

Digital Health Ecosystem: Emerging Necessity and Its Proven Advantages

The proliferation of global population at a rapid rate has made it all the more difficult to bridge the gap between healthcare system and patients, resulting in increased cost for accessing healthcare services. Simultaneously, the rising incidence of lifestyle or non-communicable diseases, increase in population belonging to the senior category, and growing health awareness among the wealthy upper class are some of the prominent contributing factors towards the increasing demand for healthcare services. The scarcity in human resources and inadequate infrastructure to cater to the growing demand has added to the pressure of developing better alternatives to the existing healthcare system. Investment in technology for leveraging the health-care delivery services in a more efficient manner was a much-needed stimulus.

Traditionally, healthcare practices have remained restricted to diagnosing, treating ailments, and prevention based on the expertise level of the healthcare professionals. The advent of technologies in the arena of healthcare, has made the healthcare delivery a precise

customized process, which does not necessarily entail the intervention of a healthcare professional at a given point of time to address any kind of emergency. The emergence of digital health technology has acted as a pillar in strengthening the delivery of healthcare across the world.

The world has witnessed a rapid boom with respect to the availability of healthcare technology products in the market in the form of wearable monitoring devices, teleconsultation practices, e-pharmacies, etc. Continuous efforts are being made in integrating advanced technologies such as robotics, Artificial Intelligence (AI), blockchain technology with pharmaceuticals and healthcare services. Research and Development in these areas have also received a boost in recent times. The incorporation of ambient computing techniques into the traditional course of healthcare delivery seeks to bridge the gap in supply. Innovative solutions imparted by the digital health revolution is a boon to people, and has helped in achieving improved standards of healthcare to people worldwide, by increasing their access to services through a window of potential opportunities, with the goal of promoting and protecting their health and well-being.

Digital health encompasses a wide spectrum ranging from apps teaching Yoga to the wristband that measures heart rate to exploring medical practitioners and scheduling consultations. The most notable applications in digital health include telemedicine, Point-of-Care Diagnostics, m-health, Medical Virtual Assistants, self-monitoring healthcare devices, Electronic Health Records (EHR), the use of big data and blockchain technology in healthcare, e-pharmacy, and e-learning in healthcare sector, among many others.

The advanced technologies used for developing these applications include, among many others, Internet of things (IoT), big data, AI, Block Chain, Chatbots, and Virtual Reality. The interlinking of each of these features has further enhanced the scope of service delivery in digital health. For instance, while IoT is crucial for equipment such as inhalers and audiometers, and minimizes the likelihood of incorrect diagnosis in such cases, big data allows analysis at a macro level for tailored treatments besides helping in detection of risk factors and potential side effects of drugs on patients. AI and blockchain enables healthcare professionals to make wiser decisions in treatments and renders administration more effective. Chatbots are one of the most popular tools used for faster communication. The use of Virtual Reality is limited to mostly patient rehabilitation and treatment in case of psychological disorders, but has

nevertheless made a significant contribution in this domain.

The establishment of a digital channel of communication between patients and doctors has made it much easier to ensure real-time monitoring of patients and track their progress. Through guide books, prevailing best practices, social media, and local popularity, the digital revolution in the health sector has provided patients with more information, such that they can make better health decisions and are empowered to manage their own health. It has transformed the manner in which health professionals deal with a disease. Technology is often more useful in identifying the right kind of treatment for an illness and also its detection at an early stage. Moreover, portal technology benefits both service-providers and service-seekers. Through access to the medical records and online interactions, it empowers patients on the one hand to be more responsible about their health and the medical professional on the other hand to have a better perception about the historical pattern of health status of an individual.

The last decade has seen a huge leap in the sphere of digital health. With increasing smartphone prevalence and the ubiquitous use of "Apps" gaining dominance, more than 4 billion downloads have been recorded for healthcare apps alone, and are paramount in the healthcare system. Mobile app-based healthcare services figure among more than 60,000 such healthcare-related apps on Android and iOS. This appears to be a promising scenario for the digital health ecosystem in India, given that the share of population using an internet-enabled smartphone is rising with every passing day.

Where Does India Stand?

Like most other nations, India too has been at the apex with

respect to the "digital health" revolution. The Government of India launched the flagship programme Digital India Campaign in 2015 which included public health initiatives geared towards adoption of digital technologies for penetration of healthcare services in rural areas. The National Health Policy 2017 envisages a Digital Health Technology Ecosystem, which through a nodal implementing authority serves the needs of all stake-holders and improves efficiency, transparency, and citizen experience. Consequently, the Ministry of Health & Family Welfare formulated the National Digital Health Blueprint in October 2019, based on the National Health Stack proposed by NITI Aayog in 2018. The blueprint has been designed as a layered framework, with a vision and a set of principles at the core, surrounded by layers relating to digital health infrastructure, data hubs, building blocks, electronic health records standards, regulations and an institutional framework for its implementation. The Prime Minister announced the implementation of this framework as the National Digital Health Mission (NDHM) on 15 August 2020. Presently, this endeavor has evolved into the Ayushman Bharat Digital Mission (ABDM).

The ABDM seeks to establish a federated health information architecture, health information exchanges, and a national health information network by 2025, that will make the healthcare system secure and interoperable enabling easier accessibility and portability of anonymized health records across public and private healthcare institutions. The ABDM is based upon five main components - Health ID, Health Facility Registry, Healthcare Professionals Registry, Health Records, and Consent Manager. The other entities in the ecosystem include ABDM Sand-

box, Health Information Providers, Health Information User, Health Repository Provider, and Health Lockers.

Alongside the efforts of the Government, independent players also have a significant role in improving the healthcare landscape in the country through innovations in wearable technologies, telemedicine, AI, virtual reality, genomics, etc. Digital health technology has brought about enhancements to revamp the delivery of value-based care, to the continuum of healthcare services in India. The adoption of intelligent solutions will help in setting aside the inequalities arising out of the barriers that have existed between healthcare system and patients historically, in not just improving the service availability, but also adding to service quality to cater to patient satisfaction, particularly with respect to hospital care and services, even in Tier II and Tier III cities in India.

While the groundwork in digital health was being laid since the last decade and its interventions have made provision for achieving desirable outcomes in maternal health, cessation programs, and mental health among others, the COVID-19 pandemic demonstrated the capability, outreach and functionality of its application - the most prominent outcome was witnessed during the Government's COVID-19 management through roll-out of the CoWIN dashboard for operationalization of the Covid vaccination programme and AarogyaSetu mobile app to aid contact tracing. These initiatives in essence have proved to be a testing ground for implementation of the large-scale, nationwide Digital Mission programme. Notably, focus has shifted from lifestyle enhancement devices and digital services to critical medical and emergency services. The target population has moved from the urban wealthy to an all-encompassing population.

Noteworthy Digital Health Initiatives

CoWIN: Web portal for operationalizing India's COVID-19 vaccination programme

AarogyaSetu: Mobile application developed to identify the risks of disease (coronavirus) contraction

Telemedicine Practice Guidelines: Practice of remote consultations through video, audio, email or text

National Health Authority (NHA): Apex body responsible for implementation of flagship public health insurance/assurance scheme called "Ayushman Bharat Pradhan Mantri Jan Arogya Yojana"

e-Sanjeevani: telemedicine system deployed nationwide to make tele-consultation

World Nature Conservation Day

India on Road to Quantitative & Qualitative Conservation of Biodiversity

World Nature Conservation Day is observed all over the world on July 28 of every year. It is observed to create awareness about protecting and conserving natural resources from threats like deforestation, illegal wildlife trade, pollution, use of plastics, and chemicals. The objective is also to increase awareness about protecting the natural resources that the Earth is bestowed with and the consequences of damaging them.

The natural world is facing an ever-increasing threat from unsustainable practices and the challenge is to preserve and conserve nature in the process of achieving sustainable development. So, it is necessary to understand what 'sustainability' truly means and also it is important to inculcate environment-friendly habits to lead a green lifestyle.

In India, the task of conserving nature lies with the Ministry of Environment, Forest and Climate Change (MoEFCC). The SDG 13 (Urgent action to protect against climate change and its impact), 15 (Sustainable use of terrestrial ecosystems and prevention of Biodiversity Loss)

been contributing in restoration of degraded forest areas in the country. This has helped in stabilization and increase in the extent of forest cover, which is evident from the India State of Forest Report. In order to achieve the targeted objectives of national afforestation programmes, the Ministry has approved the merger of NAP into GIM.

The 'India State of Forest Report 2021' found that the total forest and tree cover of the country is 80.9 million hectare which is 24.62 per cent of the geographical area of the country. As compared to the assessment

EN EXPLAINS

the objective to significantly enhance the tree outside forests and green cover in cities leading to better environment, enhancement of biodiversity and ecological benefits to the urban and peri-urban areas apart from improving quality of life of city dwellers.

The Project Dolphin and the Project Lion are in place and the associated environmental impact of this are also strengthened at the major sanctuary and forest areas for cleaner Environmental Protection of endangered species. Project Tiger not only contributed to the conservation of tigers but also of the entire ecosystem.

The Government has launched National Clean Air Programme (NCAP) as a long-term, time-bound, national level strategy to tackle the air pollution problem across the country in a comprehensive manner with targets to achieve 20% to 30% reduction in PM10 and PM 2.5 concentrations by 2024 keeping 2017 as the base year for the comparison of concentration.

The Central Government has notified a Comprehensive Action Plan (CAP) in 2018 identifying timelines and implementing agencies for actions identified for prevention, control and mitigation of air pollution in Delhi and NCR.

Graded Response Action Plan (GRAP) was notified on January 12, 2017, for prevention, control and abatement of air pollution in Delhi and NCR. It identifies graded measures and implementing agencies for response to four AQI categories, namely, Moderate to Poor, Very Poor, Severe and Severe + or Emergency.

Several steps have been taken for creating awareness amongst the general population. SAMEER app has been launched wherein air quality information is available to the public along with provision for registering complaints against air polluting activities.

The MoEFCC is implementing Environment Education, Awareness and Training Scheme with the objective to promote environmental awareness among all sections of the society and to mobilize people's participation for conservation of environment. Under the National Green Corps (NGC) programme of the

scheme.

Under EEAT scheme, Eco-clubs in schools and colleges are supported to promote environmental awareness and mobilize students' participation for environment conservation. In addition, the Central Zoo Authority flagged off the outreach campaign on 12th March, 2021 entitled 'Conservation to Co-existence: the people connect' which is a 75-week long initiative where 75 conservation priority species and 75 zoos across India are highlighted (one species and zoo per week).

The Government has developed and launched the India Cooling Action Plan (ICAP) to provide an integrated vision towards cooling across sectors encompassing inter alia re-

Ministry, about one lakh schools have been identified as Eco-clubs, wherein, nearly thirty lakh students are actively participating in various environment protection and conservation activities, including the issues related to the air pollution.

The MoEFCC, as per the mandate of Convention on Biological Diversity (CBD), encourages ex-situ conservation of Rare Endangered Threatened (RET) species and endemic plants through botanic gardens, protected areas and biosphere reserves. Financial assistance for conservation is extended by the Ministry under various schemes such as Assistance to Botanic Garden (ABG) scheme, Project Tiger scheme and Environment Education, Awareness and Training (EEAT)

ducing cooling demand, refrigerant transition, enhancing energy efficiency and better technology options with a 20-year time horizon. Space cooling in buildings being the most important can significantly contribute to achieving the goals in the ICAP and has been prioritized for implementation of the recommendations given in the ICAP.

Compiled by: Anuja Bhardwajan & Annesha Banerjee
Source: PIB

and 12 (Ensuring sustainable production and consumption patterns) of the 17 Sustainable Development Goals have been mapped majorly to this Ministry. The vision is to provide the citizens of India a clean, green and healthy environment with peoples' participation and to support higher and inclusive economic growth through sustainable utilization of available natural resources.

Government Schemes & Initiatives

The Government has taken steps to protect, sustain, conserve and augment forests in the country through promotional as well as regulatory measures. National Afforestation Programme (NAP) has been the flagship afforestation scheme of the Ministry, implemented since 2000 on pan India basis, for afforestation in identified degraded forest areas with people's participation and decentralised forest governance. National Mission for a Green India, or Green India Mission (GIM) activities were started in 2015-16. NAP and GIM, along with other afforestation schemes, have

of 2019, this is an increase of 2,261 sq km in the total forest and tree cover of the country. The present assessment revealed that 17 States/Union Territories have above 33 per cent of the geographical area under forest cover. Indian forests' total carbon stock is estimated to be 7,204 million tonnes, according to the report, and there is an increase of 79.4 million tonnes in the carbon stock of the country as compared to the last assessment of 2019. The annual increase in the carbon stock is 39.7 million tonnes.

In addition, tree plantation is being promoted as a people's movement through 'School Nursery Yojana' and 'Nagar Van Yojana'. The School Nursery Yojana is aimed at involving students in the process of raising plantations as part of their learning and by providing an environment for the students to understand and appreciate the significance of plants in maintaining and sustaining the natural ecosystem. Nagar Van Yojana aims develop 400 Nagar Vans and 200 Nagar Vatikas with

Indo-Tibetan Border Police Force

(Ministry of Home Affairs)
Govt. of India

RECRUITMENT FOR THE POST OF ASSISTANT COMMANDANT (TRANSPORT)

Indo-Tibetan Border Police Force invites online applications from eligible male & female **Indian citizens** (including subjects of Nepal & Bhutan) to fill up 11 vacancies of **Assistant Commandant (Transport) Group 'A' Gazetted (Non Ministerial) Post**. Brief detail is as under:-

Total Vacancies	UR	EWS	SC	ST	OBC	Pay Scale
11	06	01	01	01	02	Level-10 (Rs. 56,100-1,77,500) in the Pay Matrix (as per 7th CPC).

2. The vacancies are tentative and may vary due to administrative reasons. Any change in the number of vacancies will be intimated through ITBP recruitment website i.e. www.recruitment.itbpolice.nic.in. ITBPF reserves the right to make changes in sequence of the recruitment process after publication of this advertisement. ITBPF may cancel or postpone the recruitment without assigning any reason at its sole discretion on administrative grounds and same will be intimated through ITBP Recruitment website (www.recruitment.itbpolice.nic.in).

3. **Educational Qualification**- Bachelor's Degree in Mechanical Engineering with Automobile as one of the subject or Bachelor's Degree in Automobile Engineering from a recognized University or Institution.

4. **Age limit** - Not exceeding **30 years**. Crucial date for determining the age limit will be the closing date i.e. **9th Sept, 2022 (09.09.2022)**. Candidates should not have been born earlier than **10th Sept, 1992 (10.09.1992)**.

Note :-

(i) 10% of the vacancies are reserved for Ex-Servicemen. In case vacancy reserved for Ex-servicemen remains unfilled due to non-availability of eligible or qualified candidates, the same shall be filled by non-ESM candidates of respective category.

(ii) **Application Fee**- Rs. 400/- (Rupees Four Hundred only). Fees are exempted for females, Ex-servicemen and candidates belonging to Scheduled Caste and Scheduled Tribe category.

5. Applications from candidates will be accepted through **ON-LINE MODE** on www.recruitment.itbpolice.nic.in only. No offline application will be accepted. For detailed information about age relaxation, eligibility conditions, procedure of filling online application form, recruitment procedure, tests and pay & allowances etc, the applicants are advised to go through the detailed advertisement appearing on the ITBP recruitment website (www.recruitment.itbpolice.nic.in). Any further information/notification in respect to this recruitment will be made available on the ITBP recruitment website only. Applicants are advised to apply strictly as per the eligibility criteria given in the detailed advertisement to avoid disqualification at later stage.

6. The candidates whose applications are found in order, shall be issued admit cards (online) to appear in recruitment tests. Candidates have to download online admit card from ITBP recruitment website (www.recruitment.itbpolice.nic.in). Therefore, candidates should provide genuine and functional e-mail ID and mobile number at the time of filling online application form. ITBP will not be responsible in case of non receipt of admit card due to technical and other reasons.

7. The selection process will consist of Physical Efficiency Test (PET), Physical Standard Test (PST), Documentation, Written Examination, Interview & Detailed Medical Examination (DME)/ Review Medical Examination (RME).

8. Medical Examination to assess the fitness of candidates will be conducted in terms of Uniform Guidelines for Recruitment Medical Examination for GOs & NGOs in CAPFs and AR issued vide MHA UO No. A.VI-I/2014-Rectt (SSB) dated 20th May, 2015 and as amended from time to time by the Government.

OPENING DATE FOR ONLINE APPLICATION IS 11.08.2022 at 00:01 AM AND CLOSING DATE OF RECEIPT OF ONLINE APPLICATION IS 09.09.2022 AT 11:59 PM.

HOW INDIA SCRIPTED COVID ...

awareness, vaccine production, and networking. A lot of efforts went in spreading awareness among the public about the need and safety of the vaccines. Looking at the global scenario, we find that even in many developed countries, there is a sense of skepticism among the public about the safety and efficacy of COVID vaccines. Despite being much advanced, those countries are nowhere close to achieving immunization of 100% of their targeted population. Even in the most developed countries, the rate of COVID vaccination hovers around 70%. The second important step was to indigenously produce the vaccine. Third, establishing a strong network to effectively administer the vaccines to such a large population was an equally daunting task. India is a very large and diverse country. Swiftly setting up 1.5 lakh COVID vaccination centers, training 5 lakh people for vaccination and timely delivery of vaccines to the vaccination centers was a huge task. If we trace the entire vaccination drive, there were at least 11 days during which more than 1 crore doses were administered in a single day. You must be well aware that there was never a day when the drive was disrupted due to un-availability of human resources or vaccines or needles etc. This was possible because of the smooth management at all levels which in itself is a big achievement.

Question: Earlier, India had a tendency of relying on developed countries for vaccines. But when the pandemic necessitated the development of our own vaccine, the process did not take much time. What efforts were instrumental behind this success?

Dr Mansukh Mandaviya: The foremost factor that made this possible was our resolve to anyhow develop and produce a COVID vaccine of our own. For this, a COVID protection plan of Rs 920 crore was immediately sanctioned. Under this scheme, financial assistance was given to vaccine manufacturers in the country and to researchers. We also removed several administrative and regulatory speedbreakers in granting approval to research and production of vaccines. Had we followed the conventional route, the approval process itself would have taken not less than 3-4 years. But since we relaxed the norms, the research process took less than 9 months. Apart from this, a lot of emphasis was laid on spreading awareness among the public about COVID vaccination. As a result, the vaccination took place at a very rapid pace in the country. Today, India is the only country in the world to have administered the first dose of COVID vaccine to more than 98 percent of the eligible beneficiaries. Also, more than 90 percent of the beneficiaries have received the second dose. This is no small thing. 80 percent children in the age group of 12 to 15 have also been given the second dose of COVID vaccine. The door-to-door vaccination drive under the Har Ghar Dastak campaign was also a huge success. The Har Ghar Dastak campaign-phase two- is currently underway. Apart from this, under the Azadi ka Amrit Mahotsav theme, a 75-day special campaign is being undertaken for administering free precautionary dose to eligible citizens at all government immunization centres. Due to these efforts, India's COVID vaccination drive is being praised all over the world.

Question: What additional efforts are being made by the government to motivate and persuade those segments of the society who still remain skeptical or lack the enthusiasm about getting immunized against COVID?

Dr Mansukh Mandaviya: The efforts made so far have been largely successful as evident from the fact that so far more than 98 percent of the eligible population in the country has received the first dose of COVID vaccine. When the spread of COVID slowed down in the country, there was less enthusiasm among the people in getting the second dose. Sensing this, we immediately launched the Har Ghar Dastak-2 campaign. During the second phase of the Har Ghar Dastak campaign, our health workers reached out to every citizen by visiting door to door and persuading them to take the second dose. As a result, the percentage of people taking second dose also crossed 90. Efforts are still on to achieve the target of 100%.

Question: Children of the age group of 12 to 18 years have been declared eligible for COVID vaccination. Is there a special modus operandi in place to ensure all children are vaccinated?

Dr Mansukh Mandaviya: It is very important for children to get vaccinated against COVID, as it will increase their immunity. Schools have opened since June. In such a situation, it is very important to protect the immune system of the children. Keeping this in mind, all children of the age group of 12 to 18 years have been brought under the ambit of vaccination. Our health workers are going from school to school and administering the vaccine doses. Special camps are also being organized for the vaccination of children. The result of this has been very encouraging. Today, 82 percent of eligible children have received the first dose of COVID vaccine. The drive for second dose is already underway.

ENGAGEMENT OF HR CONSULTANT ON FIXED TERM CONTRACT BASIS

Munitions India Limited (MIL), is a Defence Public Sector Undertaking under Ministry of Defence, Government of India, with Corporate HQ at Pune. It was incorporated on 17.08.2021, formed by transferring 12 production units and 3 non production units of erstwhile Ordnance Factory Board. MIL possess vast core competency, resources, strength and expertise in manufacturing ammunition and explosives and is the market leader in this segment in the country.

MIL is looking for an experienced HR Consultant who wish to pursue his/her career in the company.

The engagement is purely temporary/contractual and on Fixed Term Basis and not against any permanent vacancy. This engagement will not give the candidate any claim for regular/permanent employment in the Company.

Interested candidates may download the detailed advertisement and application format from MIL website (munitionsindia.co.in).

NATIONAL HOUSING BANK

Head Office, New Delhi-110003

RECRUITMENT OF OFFICERS AT CXO POSITIONS AND OFFICERS FOR SUPERVISION ON CONTRACT BASIS
SUBMISSION OF ONLINE APPLICATION & PAYMENT OF FEES – FROM 29.07.2022 TO 22.08.2022
 (This advertisement and the web link to apply ONLINE can be accessed on www.nhb.org.in)

Advt. No. – NHB/HR & Admin./Recruitment/2022-23/01

The National Housing Bank is an apex Financial Institution in the country for housing, set up under an Act of Parliament and is a Statutory body under the Govt. of India. The Bank is the supervisor for Housing Finance Companies and is also a significant provider of development finance. The Bank seeks to catalyze institutional funds to reduce the housing shortage in the country through various developmental initiatives, particularly rural housing and housing for economically weaker sections in urban areas. The Bank is mandated for the holistic development of the housing finance market in the country.

To meet the new challenges, NHB requires experienced, talented, and committed professionals and invites applications from eligible candidates for appointment to various posts at CXO positions and other positions for supervision on a contract basis.

1. IMPORTANT INSTRUCTIONS

1. CANDIDATES TO ENSURE THEIR ELIGIBILITY FOR THE POST

- Candidates are advised to read all the instructions contained in this advertisement regarding eligibility criteria, online registration method, payment of Application Fee/ Intimation Charges & interview processes etc. and ensure to fulfil all the eligibility conditions for admission to the interview.
- The process of Registration of application is complete only when the prescribed Application Fee/Intimation Charges (wherever applicable) is deposited with the Bank through online mode on or before the last date of fee payment.
- Candidates are provisionally admitted to the interview with the requisite Application Fee/Intimation Charges (wherever applicable) based on the information furnished in the ONLINE application. Mere issue of an e-Call Letter /interview call letter to the candidate for Interview will not imply that his/her candidature has been finally cleared by the Bank. The Bank will take up verification of eligibility criteria regarding original documents at the time of the Interview (if called). If at that stage, it is found that the candidate is not fulfilling the eligibility criteria for the post (age, educational, professional qualification, post-qualification experience, etc.), his/her candidature will be cancelled, and he/she will not be allowed to appear for the Interview. Such candidates are not entitled to reimbursement of any conveyance expenses.

2. MODE OF APPLICATION

Candidates are required to apply **ONLINE** through the NHB website www.nhb.org.in from **29.07.2022 TO 22.08.2022**. **No other mode of submission of Application is accepted.** The link to go to application is given below:

vi. Reservation for Persons with Benchmark Disabilities

Under section 34 of "The Rights of Persons with Disabilities Act, 2016", only persons with benchmark disabilities are eligible for Reservation. "Person with benchmark disability" means a person with not less than forty percent of a specified disability where specified disability has not been defined in measurable terms and includes a person with disability where disability has been defined in a measurable terms, as certified by the certifying authority. The reserved categories of disabilities mentioned under this Act are namely:

- Blindness and low vision;
- Deaf and hard of hearing;
- Locomotor disability including cerebral palsy, leprosy cured, dwarfism, acid attack victims and muscular dystrophy;
- Intellectual disability including Autism Spectrum Disorder, Specific Learning Disability and Mental Illness;
- Multiple disabilities from amongst persons under clauses (a) to (d) including deaf-blindness.

Notes:

- Definition of the above specified disabilities will be as per "THE RIGHTS OF PERSONS WITH DISABILITIES ACT, 2016".
- PwBD candidates may belong to any category i.e. Unreserved /SC/ST/OBC/EWS. Reservation for PwBD is horizontal and within the overall vacancies for the Post.
- PwBD candidates should possess a latest disability certificate issued by a Competent Authority as prescribed vide The Rights of Persons with Disabilities Act, 2016 (RPWD Act, 2016). Such certificate shall be subject to verification/re-verification as may be decided by the Bank/ competent authority.

5.5 Reservation for Economically Weaker Sections (EWS)

In terms of Office Memorandum No. 36039/1/2019-Estt (Res) dated 31.01.2019 issued by the Department of Personnel and Training, Ministry of Personnel, Public Grievances & Pensions, Government of India, the category EWSs means 'Persons who are not covered under the scheme of reservation for SCs, STs and OBCs and whose family has gross annual income below **Rs. 8 lakh (Rupees eight lakh only)** are to be identified as EWSs for benefit of reservation. Income shall also include income from all sources i.e. salary, agriculture, business, profession, etc. for the financial year prior to the year of application.

Also persons whose family owns or possesses any of the following assets shall be excluded from being identified as EWS, irrespective of the family income:-

- 5 acres of agricultural land and above;
- Residential flat of 1000 sq. ft. and above;
- Residential plot of 100 sq. yards and above in notified municipalities;
- Residential plot of 200 sq. yards and above in areas other than the notified municipalities.

The property held by a "Family" in different locations or different places/cities would be clubbed while applying the land or property holding test to determine EWS status.

The term "**Family**" for this purpose will include the person who seeks benefit of reservation, his/her parents and siblings below the age of 18 years as also his/her spouse and children below the age of 18 years'.

Continued on page 26

Continued from page 25

Income and Asset Certificate Issuing Authority: -

In terms of the above-mentioned Office Memorandum, 'the benefit of reservation under EWS can be availed upon production of an Income and Asset Certificate issued by a Competent Authority. The Income and Asset Certificate issued by any one of the following authorities in the prescribed format shall only be accepted as proof of candidate's claim as belonging to EWS:-

- District Magistrate/Additional District Magistrate/ Collector/ Deputy Commissioner/Additional Deputy Commissioner/ 1st Class Stipendiary Magistrate/ Sub-Divisional Magistrate/ Taluka Magistrate/ Executive Magistrate/ Extra Assistant Commissioner.
- Chief Presidency Magistrate/Additional Chief Presidency Magistrate/Presidency Magistrate.
- Revenue Officer not below the rank of Tehsildar and
- Sub-Divisional Officer or the area where the candidate and/or his family normally resides.

Disclaimer: EWS vacancies are tentative and subject to further directives of Government of India and outcome of any litigation.

These guidelines are subject to change in terms of Government of India guidelines/ clarifications, if any, from time to time.

6. SCHEME OF SELECTION

The selection will be based on shortlisting and Interview. In case the number of candidates who apply and fulfil the eligibility criteria are more, a preliminary screening of the applications by the Screening Committee, will be carried out for short-listing eligible candidates to be called for the Interview.

Selection will be on the basis of educational, professional qualification, post-qualification experience and performance in Interview. The candidates will have to secure the minimum marks in interview & also final marks, to be considered for preparation of final rank lists. However, the selection for the post will be based on their position in respective category rank list for that post.

Merit list for selection will be prepared in descending order on the basis of scores obtained in Interview. In case more than one candidate score the cut-off marks (common marks at cut-off point), such candidates will be ranked according to their age in descending order, in the merit.

Mere fulfilling of minimum educational, professional qualification and post-qualification experience will not vest any right in candidate for being called for Interview. The Committee constituted by the Bank will decide the shortlisting parameters and thereafter, adequate number of candidates, as decided by the Bank will be shortlisted and called for Interview. The decision of the Bank to call the candidates for the Interview shall be final. No correspondence will be entertained in this regard. Merely satisfying the eligibility norms does not entitle a candidate to be called for Interview. Bank reserves the right to call only the requisite number of candidates for the Interview after preliminary screening/ short-listing with reference to candidate's qualification, suitability, experience etc.

While appearing for the Interview for the posts mentioned in this advertisement, the candidate should produce valid prescribed documents given below. In the absence of documents candidature of the candidate shall be cancelled.

List of Documents to be produced at the time of interview (as applicable):

The following documents **in original and self-attested photocopies** in support of the candidate's eligibility and identity are to be invariably submitted at the time of interview failing which the candidate may not be permitted to appear for the interview. Non submission of requisite documents by the candidate at the time of interview will debar his candidature from further participation in the recruitment process.

- Printout of the valid Interview e-Call Letter/Physical Call Letter.
- Valid system generated printout of the online application form registered.
- Proof of Date of Birth (Birth Certificate issued by the Competent Municipal Authorities or SSLC/ Std. X Certificate with DOB).
- Photo Identify Proof as indicated in **Point 10 (C)** of the advertisement.
- Mark-sheets or certificates for Graduation or Post-graduation etc.
- Caste Certificate issued by the competent authority in the prescribed format as stipulated by Government of India in the case of SC / ST / OBC category candidates. In case of candidates belonging to OBC category, certificate should specifically contain a clause that the candidate does not belong to Creamy Layer section excluded from the benefits of reservation for Other Backward Classes in Civil posts & services under Government of India. OBC caste certificate containing the Non-Creamy Layer clause should be issued during the current Financial Year (FY). Caste Name mentioned in certificate should tally letter by letter with Central Government list / notification. At the time of interview, OBC candidate should bring the caste certificate containing the Non-Creamy Layer clause issued during that Financial Year 2022-23. Candidates belonging to OBC category but coming under creamy layer and/ or if their caste does not find place in the Central List are not entitled to OBC reservation. They should indicate their category as Unreserved in the online application form.
- Disability certificate in the prescribed format issued by the District Medical Board in case of Persons with Benchmark Disability category.
- Income and Asset Certificate issued by the Competent Authority in the prescribed format as stipulated by Government of India in case of EWS category. Income and Asset Certificate should be issued during the current Financial Year. At the time of interview, EWS candidate should bring Income and Asset Certificate during that Financial Year 2022-23.
- An Ex-serviceman candidate has to produce a copy of the Service or Discharge book along with pension payment order and documentary proof of rank last / presently held (substantive as well as acting) at the time of interview.
- Candidates serving in Government / quasi govt. offices/ Public Sector Undertakings (including Nationalised Banks and Financial Institutions) are required to produce a "No Objection Certificate" from their respective employer at the time of interview, in the absence of which their candidature will not be considered and travelling expenses, if any, otherwise admissible, will not be paid.
- Experience certificates.
- Post – qualification Experience Certificates.
- Any other relevant documents in support of eligibility

Notes: - Candidates will not be allowed to appear for the interview if he/ she fails to produce the relevant Eligibility documents as mentioned above. Non production of relevant eligibility documents at the time of interview shall make the candidate ineligible for further processes of recruitment.

The Competent Authority for the issue of the certificate to SC/ST/OBC/PwBD/EWS is as notified by Government of India) from time to time. Candidates belonging to SC/ST/OBC/PwBD/EWS categories have to submit certificates in support of it at the time of interview.

Candidates to submit certificates in support of SC/ST/OBC/PwBD/EWS/Ex-Servicemen categories in the format prescribed by Government of India at the time of interview etc. Certificates of SC/ST/OBC/PwBD/EWS/Ex-Servicemen categories in format other than prescribed by Government of India shall be rejected.

7. EMOLUMENTS AND SERVICE CONDITIONS

Post	Compensation:
CXO positions	Market-linked compensation of Rs 5 lacs per month (with a fixed pay of Rs 3.75 lacs and variable pay of Rs 1.25 lacs). The variable pay to be linked to the performance rating. In case of outstation duty, travelling and halting allowances will be as applicable to Scale – VII officers of the Bank.
Officers for Supervision	Rs.1.00 lac per month (consolidated). Travelling and halting allowances shall be paid as per eligibility of Scale IV Officers of the Bank.

[^]Besides the emoluments given above, no other benefits shall be payable except TA/HA on office tours.

There shall be no probation period for the officers and in case of non-satisfactory performance, Bank shall have the right to terminate the contract by giving one month notice.

The selected candidate for the post of CXO will be liable to be posted / transferred at the sole discretion of the Bank to its various offices from time to time and on such terms and conditions as may be decided by the Bank. Further, OFS will be posted in Head Office, Delhi.

8. APPLICATION FEE AND INTIMATION CHARGES (NON-REFUNDABLE)

CAREER IN VETERINARY SCIENCE

but also plays an important role in the utilization of non-edible agricultural by-products. Livestock also provides raw materials and by-products such as manure, hides, skin, blood, bone, fat, etc.

- Animals are natural capital, which can be easily reproduced to act as a living bank with offspring as interest, and insurance against income shocks of crop failure and natural calamities.

Scope of Veterinary Medicine and Veterinary Science

Veterinary medicine is the branch of medicine that deals with the prevention, control, diagnosis, and treatment of disease, disorder, and injury in animals. Along with this, it deals with animal rearing, husbandry, breeding, research on nutrition, and products. Both veterinary science and veterinary medicine involve working with animals and coming up with solutions to animal health problems. However, careers in veterinary medicine focus more on hands-on animal care, while veterinary science careers tend to focus more on research and instruction.

Veterinary Science deals with the treatment, and well-being of all animals. The study of veterinary science ranges from preventive care to psychological analysis and complex surgical problems. Apart from caring for animal health, a veterinarian's job also includes scientific breeding and handling of livestock as well as birds, performing surgery, vaccinating animals and birds against diseases and controlling zoonotic diseases, and educating his/her client i.e., animal owners about public health & hygiene, doing research on animals for the benefit of the society. A veterinarian may also work in the field of wildlife conservation. Veterinary Science has evolved to a different level with development in Animal Stem Cell Engineering, Concepts of Aquatic Biotechnology, Animal Biochemistry and Biotechnology, Animal Cloning and Transgenic Animals, and more.

Job Roles

A veterinarian can choose to focus on a specific species or group of animals - large animals like horses, cows, and sheep, or small animals like cats and dogs. Some veterinarians work for the government to educate and encourage livestock farmers to build up the quality of their animal stock, administer vaccination and medicines or artificial insemination and handle the control and eradication of any notifiable disease.

Wildlife conservation, poultry management and healthcare,

livestock insurance, and rural development are also other areas of specialization for veterinary doctors. They also work for pharmaceutical companies to develop new medical treatments for animals, and in the holistic field, offer alternative and complementary medicine for animals.

Career Path

You first need to complete your Bachelor's in Veterinary Science (B. VSc), which takes 5 years. To take admission to this course, you need to qualify the NEET (National Eligibility Cum Entrance Test) after your class 12th, which will evaluate your knowledge of Physics, Chemistry, and Biology. Following this, in order to be able to practice, it is necessary for you to get registered with the State Veterinary Council. The license can be obtained only after completing your internship under the council for 6 months.

To pursue a course in Master of Veterinary Science, the candidate needs to have completed their Bachelor of Veterinary Science (BVSc) from a recognized university and should have secured a minimum of 50% in their graduation.

Alternative fields of study include environmental science, biotechnology, forestry and wildlife science, forensic science, microbiology, marine sciences, oceanography, and so on. If you are interested in working with animals, you could do a BSc in Zoology followed by courses in Wildlife Protection or Zoological Studies for a job with a zoological park or in wildlife protection organizations.

The Project Tiger in India, the World Wildlife Fund, and other wildlife protection organizations recruit zoologists, veterinarians, and other specialists for conservation programs and to study ways and means of preserving wildlife in the country.

Skills Required

In order to be successful, veterinarians need to possess a wide range of physical and mental skills — from practical skills such as performing surgery on animals, to interpersonal skills such as showing empathy to clients.

- Analytical skills
- Scientific aptitude
- Manual dexterity
- Interpersonal skills
- Organisational skills
- Problem-solving skills
- Academic Competencies- All veterinarians need an outstanding understanding of math, science, language, and research and a lifelong commitment to work. They need to be well aware of new scientific developments. They must be willing to take continuing education classes and attend conferences in their areas of specialization.
- They must be aware of new

drugs and techniques and should be in touch with representatives who provide new types of medical equipment and supplies for the clinic.

Opportunities for Veterinary Doctors

You can either work at established clinics under senior doctors or set up your own private practice. You can also get into research, education, or work with diagnostic laboratories. Various NGOs also employ veterinarians for consultation. Broadly career opportunities for veterinarians can be grouped as per employment agencies-

- State government
- Centralized sectors
- Local bodies/municipalities/panchayats
- Private sector and
- Self-employment in private practice

Animal Husbandry Departments of State Governments:

Various state governments recruit veterinary graduates to the post of veterinary officers/veterinary surgeons. These recruitments are made through the respective State Public Service Commissions and the basic qualification required for the posts is a graduate degree in veterinary sciences. The veterinarians in the state departments may have to look after animal health cover, animal reproduction, veterinary and animal husbandry extension, meat inspection and cattle, buffalo, sheep, goat, pig, and poultry production, breeding farms, etc. Some of the veterinary graduates are engaged in the disease diagnostic laboratories of the State Government, while a few are recruited in the biological production units. The various developmental programs of government agencies are also taken care of by these veterinary officers.

Pradeshik Co-Operative Dairy Federation (PCDF):

PCDFs work through cooperative societies and are involved in the production/procurement of milk and milk products and the upliftment of dairy animals. It provides animal health care, veterinary extension, and animal reproduction facilities to livestock farmers. It employs a large number of veterinary graduates. The job is quite challenging and entails hard work.

Entrepreneurship:

The establishment of one's own veterinary clinic is the best bet for an aspiring, forward-looking, competent, confident, and hard-working young veterinarian. He is his own master in this venture. Private clinics have been established in large numbers in metropolitan cities and towns. In cities, veterinarians are confined to small animal practice but in towns, they are engaged in mixed practice. Canine breeding is also practiced by some of

these practitioners, which is quite rewarding since there is a great demand for pedigreed pups.

Bank and Insurance Companies:

Most of the nationalized banks and insurance companies also recruit veterinary graduates to supervise and monitor sanctioning/awarding of funds for the purchase of milch animals under various loan schemes, preparation, and screening of various project proposals, etc. Before choosing this career, one has to keep in mind that the veterinarians engaged in these organizations do not get the opportunity of rendering professional services in the area of treatment and control of diseases in animals.

Pharmaceutical Companies:

A large number of Indian and multinational pharmaceutical companies have entered into the production of veterinary drugs and pharmaceuticals. They employ veterinary graduates for the production, quality control, and marketing of drugs and vaccines. The job is quite challenging, demanding, and involves professionalism.

Remount Veterinary Corps (RVC):

RVC of the Indian Army offers a very rewarding career to an aspiring and dedicated veterinary graduate who is interested in a disciplined and active life. Veterinary graduates are selected for short service commissions or for permanent commissions and recruitment is done through the Services Selection Board. The job requires breeding, feeding, management, disease control, and treatment of animals maintained by the army, managing breeding centers, remount depots, slaughter houses, military dairy farms, etc.

Paramilitary Forces:

A limited number of veterinary graduates are recruited by the Indo-Tibetan Border Police (ITBP), Border Security Force (BSF), and other paramilitary forces to manage dog and equine breeding centers and provide animal health cover and surveillance.

Diagnostic Laboratories:

There are a number of disease investigation centres that

provide quick diagnostic facilities. Such laboratories also recruit veterinarians to undertake disease diagnostic work.

Zoo and National Parks:

Though the zoo and national parks get veterinary assistance through respective animal husbandry departments, some of them recruit their own veterinary officers to provide health care to their animals. The job is quite challenging and rewarding.

Teaching and Research Organizations:

The veterinary graduates who have acquired higher qualifications, viz. M.VSc, Ph.D., etc. are engaged by various academic and research institutes of different state universities/colleges, UPSC, ICAR, etc. They undertake teaching, research, and extension work.

Colleges/Institutes for Veterinary Science

Indian Veterinary Research Institute, Bareilly; Banaras Hindu University, Varanasi; College of Veterinary Science and Animal Husbandry, Aizawl; the Lala Lajpat Rai University of Veterinary and Animal Sciences, Hisar, etc are among the top institutes that regularly recruit Veterinarians for teaching positions.

Research and Development Wings

Most pharmaceutical and other organizations have research and development wings for carrying out trials or developing protocols for clinical trials. They also recruit a few veterinary graduates. However, they prefer the Master/Ph.D. degree holders in their respective specializations to undertake the challenging task.

Top Recruiters in Veterinary Science

- The Indian Veterinary Research Institute (IVRI)
- Terzetto Pharma Metrics
- PETA India
- CRPF paramedical department
- Indian Council of Medical Research (ICMR)
- The Indian Veterinary Association
- Vixilanciaa

QUESTION OF THE WEEK

July 28th is celebrated as World Nature Conservation Day to create awareness about protecting and conserving natural resources. India has had many local practices that have contributed immensely in conserving the forests, water resources, and the wildlife. Chipko Movement is one example. Which such movement/practice/technique inspires you the most and you think should be adopted at a national level in order to add to the momentum of existing conservation practices in the country?

Entries may be sent to writetous.en@gmail.com latest by 10/8/2022 in English/Hindi/Urdu and should be of 200 to 250 words. Entrants must clearly mention their Name, Age, Full Address, Email ID and Contact No. The entry adjudged best will be published in Employment News/Rozgar Samachar (issue dated 20 - 26 August, 2022) and will be eligible for a three-month free subscription of Yojana/ Kurukshetra/ Aajka as per the winner's choice.

**BEST ENTRY FOR
ISSUE DATED 09-15 July 2022**

Question: Mithali Raj recently announced her retirement from all forms of international cricket. Mithali Raj has not only been an extraordinary player, but has become the face of Women's cricket in India in recent times. Do you think the perception towards women's cricket have evolved in the country? Share your opinion.

ARUSHI ANAND

NEW DELHI

From breaking records to inspiring young girls and women, Mithali Raj has become synonymous with women's cricket in India. The over two-decade journey of Mithali Raj wasn't easy at the time of less coverage for women's cricket and minimal audience. But it was the sheer perseverance and positive attitude that led India's women team to the finals of World Cup, a whopping three times. Yes, I do think that the perception towards women's cricket has become more embracing and welcoming over the years in the country. This can be seen with Indian women cricket team being chosen as part of the Commonwealth Games 2022. This has ushered in a new era by changing the society's mindset towards the participation of women in a once male-dominated sport. But, it cannot be denied that the battle is not completely won at this juncture. With different tournaments for men's cricket like IPL, under-16, etc., the women's cricket team is a bit neglected at present with fewer matches. Though, enormous change with acceptance of women's cricket in India is visible with increased viewership and its continuous growth but societal pressures and family restrictions still hinder the pathway. At the end, no doubt, the positive perception can be seen with the young girls feeling empowered to take up cricket as a profession with women like Mithali Raj to look up to. An accelerated awareness and constant support from society is the way for women's cricket to flourish not only in India but internationally as well.

**Government of India
National Technical Research Organisation**

Recruitment Notice

Applications are invited through ONLINE Registration for engagement of **Consultants (Drone Technology)** in National Technical Research Organisation (Government of India) purely on contract basis.

2. The desirous applicants are requested to visit the website <https://ntro.gov.in> for the detailed recruitment notice containing eligibility criteria, essential qualification, required experience/skill set, schedule of online registration and other terms and conditions. The applicants fulfilling eligibility criteria are required to register themselves **ONLINE** by visiting the said website. Applications submitted through any other mode will **NOT** be accepted.

3. ONLINE registration is tentatively scheduled to start on **30.07.2022**, which would remain open till **12.08.2022**. Change in the online registration schedule, if any, will be notified/updated in the said website.

INDIA'S DIGITAL HEALTH ECOSYSTEM ...

available at more than 1.5 lakh health facilities

Challenges of Implementing Digital Health Ecosystem in India

The NDHM envisages to "create a national digital health ecosystem that supports universal health coverage." Towards this goal, a robust capacity building system, which takes into consideration both the intrinsic and contextual factors, is required without which the exercise would be rendered inefficient in terms of acceptance, usability, and data aggregation. Recent studies uniformly confirm the view that strong governance is the key to the success of digital health. However, digital governance needs careful optimization, across various levels of healthcare for a holistic digital health ecosystem in India. The operation of digital platforms in silos owing to limited interoperability, noncompliance to standards, and lack of data governance frameworks, coupled with the absence of trained workforce is detrimental, and therefore, an optimal data governance mechanism would need to be put in place. A specific health data protection law or guidelines is essential to prevent misuse of personal information.

The responsibility of on-ground implementation in matters of health lies with the States/UTs. Although in most of the cases, policy prescriptions are centrally directed, federal structure of the system entitles the states to differ from central health perspectives, thereby giving rise to precarity in alignment across the nation. A roadmap may be developed,

recognizing common challenges and offering broad solutions in this regard, which may be implemented by states in a tailor-made and suitable manner.

The biggest implementational challenge that has been daunting the healthcare sector in India for quite some time is ensuring timely capacity building of the human resources, which in turn hampers leadership and management capacity. Concerted efforts from the Centre and States/UTs would be required to close these gaps.

Given India's demographic and socio-cultural diversity, it is extremely important to understand the usability of digital applications from the users' perspective and thereby integrate existing portals in India to offer a seamless experience. This calls for a collaboration among interface designers, administrators, the end users, such that a participatory co-design approach is adopted while designing it. High patient load and poor participation from private health-care providers towards health data aggregation are also some of the key challenges.

While smart phone penetration rate has increased over time, it is important to note that there is a stark difference across geographical locations, especially rural and urban. Therefore, low digital literacy and the vast digital divide among the Indian population are some of the barriers that need to be overcome.

Opportunities Ahead

Despite implementational challenges, the technological revolution has started making an impact on the healthcare system in India. Digital health poses immense potential to transform

the delivery of health services in the near future for better patient care. In the post-pandemic era, when the world is struggling to recover, the emphasis lies on recalibrating the public health strategies towards digital tools, especially when it comes to "preventive" care. Tools and innovations that are easy to use and affordable are likely to be the most-demanded product in future, especially for women, marginalized and vulnerable groups with greater focus on ensuring accessibility, affordability and quality services.

Based on a latest report by India Health, telemedicine can reduce the consultation time by 10 to 15 minutes in both rural and urban areas. This ensures optimal utilization of doctors and by avoiding the need to travel to a clinic or hospital, it will cut down the out-of-pocket expenditure for availing healthcare services. AI has a big role to play in improving clinical outcomes as increasing amounts of health data becomes more available and analysis techniques improve. Smart health monitors have the ability to collect personalized vital signs and test results in real-time, which may aid the rapid diagnosis, timely and proper treatment at an early stage, eliminating travel and wait times for diagnosis. It also increases operational efficiencies for doctors and assures patients with improved support and feedback. Mobile-based health apps have immense potential for preventing serious diseases by increasing patient engagement, providing health education, and expert guidance from healthcare providers.

In India, start-ups in the digital healthcare arena are eventually turning out to be a vibrant ecosystem, in the backdrop of the need for viable solutions. As per a 2018 report, there are 4,892 startups in the Indian

healthcare space, that goes beyond a specific disease, domain, geography, product, service or business model. Digital start-ups have introduced novel technologies to the Indian healthcare system. Especially with respect to noncommunicable diseases (NCDs), the digital platforms have provided requisite structure for capturing the chronic patient pool. Most importantly, it has enabled the capturing of non-clinical data, which forms an integral part in preventing NCDs. Conventionally, most start-ups seek to provide administrative solutions such as automating internal processes, digitization of health records and other such requirements. While most start-ups typically cater to the metro cities, the urban-rural divide is gradually reducing given the proliferation of the internet coupled with improving connectivity. With the adoption of a multi-disciplinary approach, there is scope for improved in-depth clinical focus in service delivery. A professionally diverse team consisting of medical professionals and product engineers, might be a potential remedy.

Social media has also been a major driver in the development of digital life. Exclusive social media platforms catering to patients with similar health concerns will not only help connect them and exchange information, the data collected by the platform can be used to improve health care services and devices, which ultimately improves people's lives.

The ABDM (Ayushman Bharat Digital Mission) is a much-needed strategy to build the digital health ecosystem in the country and thereby encourage innovation in the health sector, which bring together public-private partnership. Efforts until now have laid the path for a strong digital health ecosystem in India in the right direction towards increasing access to equitable health services and thereby improving health outcomes. A promising future is awaiting to be witnessed.

■ Droupadi Murmu Elected as 15th President of India

Ms Droupadi Murmu has been elected as the 15th President of India. Returning Officer of the Presidential Election and Rajya Sabha Secretary General P C Mody announced the election of Ms Murmu after completion of counting of the votes on 21st July 2022. Ms Murmu bagged 64

per cent of the votes in the poll and opposition candidate Shri Yashwant Sinha got 36 per cent. Born on 20th June 1958, Ms Droupadi Murmu is the youngest President of the country. She is the first President of India who is born after Independence. In 1997, Ms Murmu first joined politics and was elected councillor in Rairangpur Notified Area Council of Mayurbhanj district in Odisha. She served twice as an MLA from Rairangpur assembly constituency from 2000 to 2009 and once as a Minister for Commerce, Transport, Fisheries and Animal Resources Development, Government of Odisha. On 18th May, 2015, Ms Murmu took oath as Governor of Jharkhand and stayed in the post till 12th July 2021. She was the first woman Governor of the state and the first female tribal leader to serve as a Governor in any Indian state.

■ PM Calls Upon Public to Strengthen Har Ghar Tiranga Movement

Prime Minister Shri Narendra Modi has called upon people to strengthen the Har Ghar Tiranga Movement as the nation is marking Azadi Ka Amrit Mahotsav this year. In a tweet, Mr Modi asked people to hoist the Tricolour or display it in their homes between 13th and 15th August. He said, this movement will deepen our connection with the national flag.

■ India Innovation Index 2021: Karnataka, Manipur, Chandigarh Lead the Way

In the India Innovation Index 2021, Karnataka has topped again in the Major States category, Manipur is leading the North East and Hill States category and Chandigarh is the top performer in the Union Territories and City States category. Releasing the index on 21st July 2022, NITI Aayog pointed out that resilience and crisis-driven innovation have helped India bounce back from the pandemic-induced crisis. The index strengthens the scope of innovation analysis in the country by drawing on the framework of the Global Innovation Index (GII). Through this comprehensive framework, the index evaluates the innovation performance of all the states and union territories in India.

■ NSDC Collaborates with Toyota to Train 18000 Students for Automotive Sector Jobs

The National Skill Development Corporation (NSDC) has signed a Memorandum of Understanding (MoU) with Toyota Kirloskar Motor [TKM] and Automotive Skill Development Council (ASDC) to train 18,000 students in three years, with special focus on rural areas, making them more employable through the company's unique training initiative - Toyota Technical Education Program (T-TEP). These students will be trained across five automotive job roles such as General Technician, Body and Paint Technician, Service Advisor, Sales consultants and Call Center Staff.

■ Indian Students Bag 3 Gold, 16 Silver, 5 Bronze in International Olympiads

Indian students have bagged an impressive number of medals in various international Olympiads in Mathematics, Physics, Biology, and Chemistry. While the International Mathematical Olympiad (IMO) was held in Norway and Biology Olympiad in Armenia, the other two, hosted by Switzerland and China, were held virtually. Pranjal Srivastava scored a hat trick with his 3rd consecutive Gold medal at the IMO becoming the first Indian to win 3 Gold medals at the IMO. In the International Physics Olympiad (IPhO), Deevyanshu Malu won Gold, while Mayank Pandhari won Gold in the International Biology Olympiad (IBO).

■ Ranil Wickremesinghe, Dinesh Gunawardena Become Sri Lanka's New President, PM

In Sri Lanka, six-time Prime Minister Ranil Wickremesinghe was sworn in as the country's new President on 21st July 2022. Ranil Wickremesinghe, in a closely contested election earlier on 20th July, defeated Dullus Alahaperuma, securing 134 votes against 82 votes secured by Alahaperuma. Meanwhile, on 22nd July, Dinesh Gunawardena took the oath as the Prime Minister.

■ MoU Enhancing Opportunities for Indian Seafarers, Healthcare Workers in UK

India and the UK have signed two MoUs on mutual recognition of educational qualifications including maritime education and a Framework Agreement on health care work force. The first MoU provides for mutual recognition of educational qualifications and duration of study undertaken by students within duly approved and recognized higher education institutions in the two countries. The MoU on maritime education qualification paves way for the two governments to mutually recognize the certificates of maritime education and training, competency and endorsements of seafarers issued by each other. It will prove beneficial for employment of seafarers of both the countries and would make them eligible for employment on ships of either party. India being a seafarer supplying nation with large pool of trained seafarers, it is expected to be significantly benefitted by the MoU. The Framework Agreement on Healthcare Workforce includes cooperation on Nursing & Allied Health Professionals (AHPs), training of healthcare professionals and measures to bridge the skill gap. The agreement will facilitate the recruitment and training of nurses and AHPs from India by UK in a streamlined manner. Given the shortage of nurses in the UK, the agreement will benefit both the sides.

■ FDI Inflow in R&D Sector Registers 516% Increase

India attracted USD 343.64 million FDI equity inflow in R&D (Research and Development) sector during 2021 (Calendar Year) which is 516% higher as compared to previous 2020 (USD 55.77 million), according to the Ministry of Commerce and Industry. FDI is permitted under the 100% automatic route in R&D sector. Karnataka is the top FDI Equity recipient state in R&D followed by Telangana and Haryana. Singapore is the top investing country in R&D with 40% share of total FDI Equity followed by Germany (35%) and U.S.A (11%). Further, FDI Equity inflow from several countries like Germany, Mauritius, France, Singapore, Oman and U.S.A. showed an increase of more than 200% as compared to previous year. These trends indicate a robust and growing R&D sector which would benefit the economy by driving innovation, increasing productivity, thereby leading to higher economic growth.

■ New Rule for Work from Home for SEZ Employees Notified

The Union Government has notified a new Work from Home (WFH) policy to be implemented uniformly across as Special Economic Zones in the country. The new Rule 43A under the Work from Home in Special Economic Zones Rules, 2006, was notified by the Department of Commerce on demand from the industry. As per the new notification, WFH may be extended to maximum 50 percent of total employees including contractual employees of the unit. WFH is now allowed for a maximum period of one year. However, it may be further extended for a period of one year at a time by the Development Commissioner at the request of units. Employees of Information Technology (IT) and Information Technology-enabled Services (ITeS) SEZ units, employees who are temporarily incapacitated, employees who are travelling and employees who are working offsite can avail the facility.

■ Young Indian Grandmaster R Praggnanandhaa Wins Paracin Chess Title

Young Indian Grandmaster R Praggnanandhaa has won the Paracin Open 'A' chess tournament 2022 in Serbia. The 16-year-old remained unbeaten and finished half a point ahead of the field. Second-seeded, Praggnanandhaa scored 8 points from nine rounds. The teenage prodigy will be part of a strong India 'B' team in the 44th Chess Olympiad to be held near Chennai from July 28.

■ ISSF World Cup: India End Changwon Campaign with Most Medals

India finished yet another ISSF (International Shooting Sports Federation) World Cup campaign in Changwon, South Korea, by topping the medal tally with a haul of 15 medals, including five gold, six silver and four bronze. Arjun Babuta won gold in the men's 10m air rifle, Shahu Tushar Mane/Mehuli Ghosh won gold in 10m air rifle mixed team, the team of Arjun Babuta, Shahu Tushar Mane and Paarth Makhija won another gold in men's 10m air rifle team, Aishwary Pratap Singh bagged gold in men's 50m rifle 3P, and Mairaj Ahmad Khan became the first Indian to bag a gold in men's skeet. The next big assignment for the Indian rifle and pistol shooters will be the much-awaited ISSF World Championship scheduled in Cairo in October this year. The shotgun squad, on the other hand, will take part at the ISSF Shotgun World Cup, slated to take place in Osijek, Croatia in September. A good performance by the Indian shooters at the World Championships means they will have a chance to represent India at the 2024 Olympic Games in Paris. (Source: AIR/PIB)
